TOTAL SPEAKER SOLUTIONS
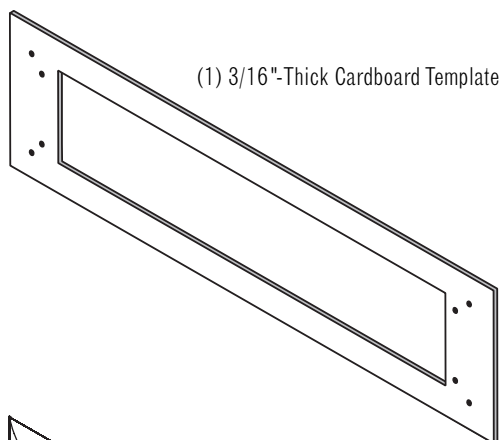

TSS-FMK4000
Owner's Guide

INTRODUCTION

The TSS-FMK4000 allows you to recess a TSS-SAT4000 or TSS-CENTER4000 into the wall. When installed, the speaker will extend beyond the wall approximately 1."
Unpacking the Components

Finish unpacking the flush-mount kit and check the contents. If you suspect damage from transit, report it immediately to your dealer. Keep the shipping carton and packing materials for future use.

Contents

Please verify that the package contains the following items:

(1) 3/16"-Thick Cardboard Template

(2) End Brackets

(1) Speaker Frame

(2) Mounting Blocks

(2) Sealing Strips

(4) #8 x 1" Flat-Head Wood Screws

(4) #8 x 1-1/8" Pan-Head Wood Screws

(2) 1/4-20 x 3/4" Flat-Head Machine Screws

Important Notes:

1) In order to horizontally flush-mount the TSS-CENTER4000 in a wall with standard 16" spacing between the studs, some modification to that area of the wall will be necessary. This type of installation will require a professional licensed contractor to install horizontal braces that comply with the customer's local building codes.

2) For a **satellite** installation, follow all the steps but cut the hole in a vertical direction, perpendicular to the floor. See exploded view on page 7.
Step One

Remove both end caps of the speaker by unscrewing the single center screws.

Speaker

End Cap

Center Screw
1/4-20 x 3/4" Screw

Step Two

Attach both of the end brackets to the speaker ends with the 1/4-20 x 3/4" flat-head machine screw, as shown.

End Bracket

Step Three

After you have found the correct placement on the wall for the speaker, use the template provided to draw the exact-sized hole required. Make sure to use a level when positioning the template to ensure that your installation is level. Then cut out the drywall to create the hole.
Wall

Template

Screw Holes

NOTE: The hole for the speaker should be 22-1/2" x 4-3/8."

22-1/2"

4-3/8"

Step Four

Place the mounting blocks inside the hole at either end. Use two #8 x 1" flat-head wood screws to secure them in place.

Flat-Head
Wood Screws

Mounting
Block

Step Five

Attach speaker wires as described in the speaker's owner's manual and, using four #8 x 1-1/8" pan-head wood screws provided, screw the speaker assembly into place, making sure that the screws anchor themselves into the mounting blocks behind the drywall.

Pan-Head
Wood Screws

Step Six

Apply the sealing strips to either side of the speaker to cover the remaining openings of the cutout in the drywall.

Sealing Strip

Step Seven
Remove the paper cover from the gasket on the speaker-facing side of the frame. Place the frame over the in-wall assembly and snap it into place.
